INDEX TO SUBJECTS

ABSORPTION, in intestine of suckling rat, 41
Acetylcholinesterase, intercellular localization, 433
Alkaline glycerophosphatase in papilla foliata of tongue, 173
Amitosis, in ciliated protozoon, *Euplotes*, 295
Androgens, effects on rate of incorporation of mucopolysaccharides into glycoproteins in rooster comb, 319
Annulate lamellae, sand dollar eggs, 117
Anther development, DNA synthesis in, 187
Antibody, cell reaction, fine structure, 405

BACILLUS *subtilis*, fine structure, 123
— *subtilis*, sporulation, 129
Bacteriophage, number in bacterial cell determined from thin sections, 469
Blood clotting, 11

CARBONIC anhydrase, and fine structure of cells of pseudobranch gland of teleost, 393
Cell division, incomplete in spermatogenesis, 453
Cellular ingestion, 41
Chicken sarcoma, (induced), fine structure of, 143
Chiton synthesis, colleterial gland of cockroach, 257
Chromosomes, aberrations induced by x-rays, 479
—, changes induced by cupferron and KCN, 351
—, effect of anaerobiosis on, 135
—, salivary gland, content of RNA and DNA, 461
—, *Vicia faba*, 135
Cilia, filaments of, 269
Ciliary ganglion, and distribution of acetylcholinesterase, 433
Cnidoblasts, fine structure, in *Hydra*, 441
Cockroach, colleterial gland, fine structure, 257
Coenzymes, DPN and TPN, limitations in accepted techniques for demonstration of, 309
Collagen, chick fibroblasts, 153
—, formation of, 153
Crystals, intracellular, in midgut cells of *Limnoria*, 385
Cytoplasmic inclusions, in rat ovum at various stages of development, 327

DENDRASTER *excentricus*, fine structure of ova, 117
Diaphorases, DPN and TPN, factors in histochemical demonstration of, 309
DNA, amounts compared in anaphase and interphase, 217
—, electron microscopy, 167
—, herring sperm, 167
—, liver cells, influence of cortisone, 251
—, ovarian tumors, 217
—, reassociation with protein of cell after extraction, 231
—, similarities in x-ray diffraction patterns irrespective of source of, 397
— synthesis, in anther development, 187
— synthesis, relation to RNA metabolism, 461
DNA-histone synthesis during amitosis in *Euplotes*, 295
Drosophila, crystal cells in larva, 235
—, salivary gland chromosomes, RNA-DNA relationship, 461

EHRLICH ascites cells, protein synthesis and lipide accumulation in, 421
— ascites cells, response to ultraviolet radiation, 205
Electron microscopy, study of biopsies, 508
Endoplasmic reticulum, association with mitochondria in cells of pseudobranch gland, 393
— reticulum, in differentiation of nematocysts, 441
— reticulum, in root cells of maize, 501
Epicotyl, pea, microsomes of, incorporation of leucine, 59
Epithelium, intestine, fine structure, 363
Escherichia coli, cytology of, 51, 55
— *coli*, number of infecting phage particles determined from thin sections, 469
Euplotes, macronuclei of, 295
Eye, vertebrate, light-reflecting mechanisms, 35

FAT absorption, by cells of intestinal villus, 373
Fermentation, inhibition of in *Vicia faba*, 135
Fibrinogen, 11
Fibroblasts, chick, fine structure of, 153
—, chick, in collagen production, 153
—, in adult rats, response to RNA, 25
Fixation, *Bacillus subtilis*, 123
—, of plant cells with $KMnO_4$, 501

Fixation, with OsO_4 in high concentrations, 269
—, with OsO_4, of myelin figures, 491

GLYCOPROTEINS, incorporation of mucopolysaccharides, studied by C^{14}-assay and autoradiography in rooster comb, 319
Golgi complex, and crystal formation, 385
— complex, in root cells of maize, 501
— complex, and nematocyst formation, 441

HISTONE, absence of in *E. coli*, 51, 55

Hydra, cnidoblast, fine structure, 441
—, fine structure, nematocysts, 69, 79
—, fine structure, stenoteles, 79
Hydrolytic enzymes, diffusion of components into fixatives and embedding materials, 279
— enzymes, histochemical significance of lyo and desmo components of, 279

INGESTION, cellular, 41

Inhibitor, in mouse mammary tumor agent, 85
Intercellular bridges, fine structure, 453
— relationships, oocyte and follicular cells, rabbit, 347
— relationships, oocyte and follicular cells, rat, 327
Intestinal epithelium, human, fine structure of, 171
Intestinal villus, fine structure, during fat absorption, 373
— villus, rat, fine structure, 363

LAMELLAE, structure in *Porphyridium cruentum* affected by light intensity, 289
Leucine, incorporation into subcellular components, 59
Limnoria lignorum, crystals in cells of midgut glands, 385
Lipide storage and protein synthesis in L strain and Ehrlich ascites cells, 421
Lipoproteins, in mechanisms of pea epicotyl, 59
Liver, mitochondria, in rat, 97
— nuclei, DNA variation with cortisone treatment, 251

MACRONUCLEUS of *Euplotes*, 295

Maize, fine structure of root cells, 501
Meiosis, fine structure, crayfish, 177
— in anthers, *Lilium longiflorum*, 187
Microsomes, anterior pituitary, 17
—, incorporation of leucine, 59
—, transforming properties, 25
Microtomy, glass knife preparation, 175
—, selection of glass for knives, 507
Mitochondria, anterior pituitary, 17
—, effects of thyroxine on, 97
—, in association with endoplasmic reticulum, 393
—, rat liver, 97
—, swelling induced by glutathione, 109
Mitochondrial membrane permeability, after thyroxine, 97
Mitosis, control in excised roots, 411
— in anthers, *Lilium longiflorum*, 187
Mitotic apparatus, sea urchin, 353
Molluscum contagiosum, dense granules in elementary body, 513
Mouse mammary tumor agent, biophysical study, 85
Mucopolysaccharides, incorporation into glycoprotein in rooster, 319
Muscle cells, electron microscopy of differentiation, 169
— cells, heart, fine structure, 169
—, insect and multiterminal innervation, 241
Myelin figures, fine structure after OsO_4 fixation, 491
Myofibrils, formation of, 169

NEMATOCYSTS, cytology of, 69, 79

Neuromuscular junction, fine structure insect muscle, 241
Nissl substance and acetylcholinesterase, 433
Nuclei, anterior pituitary, 17
Nucleic acid, histochemistry, 231
Nucleoproteins, 1
—, cytochemical study of, 231
—, in *E. coli*, 55

OTOCYST, of fowl embryo, organ culture and fine structure, 263
Ova, sand dollar, fine structure, 117

PANCREAS, guinea pig, 1

Periplaneta americana, colleterial gland of, 257
Peroxidase, use in differentiation of phagosomes from mitochondria, 193
Phagosomes, morphology and identification, 193
Phospholipides and organization in myelin figures, 491
Photographic emulsions, electron microscopy, 181
Pinocytosis, intestinal cells of suckling rat, 41
Pisum sativum, mitotic activity in roots, 411
Pituitary, anterior, beef and pig, 17
—, anterior, cell fractions of, 17
Porphyridium cruentum, fine structure of, 289
Protein, associated with DNA in *E. coli*, 51, 55
— molecules, 11

protein synthesis, colleterial gland of cockroach, 257
— synthesis, relation to lipide metabolism in L strain and Ehrlich ascites cells, 421
Proteins of mitotic apparatus, 353
Pseudobranch gland, fine structure of, 393

RED algae, plastid similar to green plants,' 289
Retina, rabbit, 245
Ribonucleoprotein particles, 1
Ribonucleoproteins, inducing heteromorphic changes, 25
RNA in chromosomes of *Drosophila* salivary gland, 461
—, induction of changes in fibroblasts by, 25
— metabolism and relation to DNA synthesis, 461
—, reassociation with protein of cell after extraction, 231
Root tips, nutritional control of mitosis in, 411

SEA urchin, sperm tail, fine structure, 269
Specimen supports in electron microscopy, 167
Sperm, sea urchin, fine structure of tail, 269
Spindle, meiotic, fine structure, 177
Spores, bacterial, fine structure, 129
Staining, for electron microscopy, 511
Stains, use of mercuric bromphenol blue for electron microscopy, 343
Stem cell, origin of dividing cells in tumors, 217
Swelling of mitochondria, 97, 109
Syncytia, and synchronous differentiation, 453

TAPETUM lucidum, of cat, fine structure, 35
Tissue biopsy for electron microscopy, 171
Tongue, rabbit, histochemistry of papilla foliata, 173
Tumor agent particles, mode of generation, 93
— agents, mouse mammary cancer, physical properties, 85, 93
— cells, abnormal cytology of, 143
— cells, response to ultraviolet radiation, 205
Tyrosine-C^{14}, use in cytological localization, 235
Tyrosine-tyrosinase system, in crystal cells of *Drosophila*, 235

ULTRAVIOLET microscopy, flying spot, 205
— radiation effects, 205

VICIA *faba*, chromosomal aberrations, effects on by chelating agents and respiratory inhibitors, 479
Visual cells, fine structure, rabbit retina, 245
— cells, response to iodoacetate, 245

X-RAY diffraction, nucleoproteins of *E. coli*, 55
X-rays, effects enhanced by cupferron and KCN, 351
X-ray–induced aberrations in chromosomes under influence of chelating agents and respiratory inhibitors, 479

ZONA pellucida, fine structure, in rat oocytes, 327
